- Mining
- Water

Workshop Capabilities

Workshop No. 1

Floor Area: 1800m²

Overhead Travelling Crane

Bay 1 SWL: 3.2t

Bay 1 floor to underside of hook: 6.0m

Bay 2 SWL: 5.0t

Bay 2 floor to underside of hook: 6.0m

Workshop No. 2

Floor Area: 2000m²

Overhead Travelling Crane

Bay 1 SWL: 10.0t

Bay 1 floor to underside of hook: 8.6m

Bay 2 SWL: 5.0t

Bay 2 floor to underside of hook: 6.0m

Equipment

Croppers (2 off)

Maximum material thickness (M.S.): 6mm

Maximum sheet width: 2.4m

Rollers

Maximum material thickness (M.S.): 16mm

Maximum material width: 2.5m

Guillotine

Maximum material thickness (M.S.): 8mm

Maximum material width: 2.4m

Hydrabend

Maximum material thickness (M.S.): 3mm

Maximum material width: 2.4m

Straight Edge Welder

Maximum length: 6m

Vertical Rotators (2 off)

Table diameter: 4.2m

Horizontal Rotator

Diameter: 4.0m

Length: 13m

Automatic Horizontal Bandsaw

Make: Cooen

Model: C-300NC

Maximum Material Size 14" x 12"

Projects Specialising In:

- General building structural steelwork including: Schools, Supermarkets, Aged Care Villages, Offices, Transfer Towers & Pedestrian Bridge Steelwork.
- Architectural steelwork including Shelters, Balustrades & Handrails
- Conveyors including Structural Steelwork & Mechanical Steelwork
- Winery Equipment – Catwalks, Service Bridges, Support Structure, Marc Bays & Stainless Receptacles
- Rig Camp Container Skids & Structures/Walkways
- Tanks – Water & Mining
